```java
// Creates a linked list used in the chaining method
public class HashEntry {
    private int key;
    private HashEntry next;

    HashEntry(int key) {
        this.key = key;
        this.next = null;
    }

    public int getKey() {
        return key;
    }

    public HashEntry getNext() {
        return next;
    }

    public void setNext(HashEntry next) {
        this.next = next;
    }
}
```
